Dear Hiring Manager,

I am excited to apply for the Daposition at TCS. With a BTech in Computer Science (CSE) and 1-3 years of experience in data analysis, I bring a strong foundation in SQL, R, Python, and Excel, along with hands-on experience in data visualization tools like Power BI and Tableau. My expertise lies in collecting, cleaning, and analyzing large datasets to derive actionable insights, which aligns perfectly with the key responsibilities outlined in your job summary.

During my previous roles, I successfully developed dashboards and reports to support cross-functional teams, identified trends to drive strategic decisions, and optimized data collection processes through automation. My ability to communicate complex data insights to both technical and non-technical stakeholders has been a key strength, enabling me to bridge the gap between data and business outcomes. I am particularly drawn to TCS's dynamic team and the opportunity to work on exciting data projects that foster career growth and learning.

With my technical skills, attention to detail, and passion for data-driven decision-making, I am confident in my ability to contribute meaningfully to your team. I would welcome the opportunity to discuss how my background aligns with TCS's goals. Thank you for considering my application.

Sincerely,

Komal Jadhav

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with the needs of your team. Please feel free to contact me at or .

**Sincerely,**

---
